Evolution: Probable or Problematic?

Jay seegert
I would like to personally thank you for watching the Origins program. Origins was a special program, near to the heart of my late husband, Russell Bixler.

I trust that the information in this presentation will be helpful in your study of creation science. Thank you for your prayerful and financial support of Origins... you’re making the television production of this program possible.

Envision the Transformation

Australian Lungfish

Newt
“You cannot be both sane and well educated and disbelieve in evolution. The evidence is so strong that any sane, educated person has got to believe in evolution.”
Two Types of Changes

- Built-In Variation
  - Via existing genes (*Predictable*)

- Random Mutations
  - Accidental copying mistakes (*Unpredictable*)
"after their kind"
