

Analyzing An
OUTDATED THEORY

I would like to personally thank you for watching the Origins program. Origins was a special program, near to the heart of my late husband, Russell Bixler.

I trust that the information in this presentation will be helpful in your study of creation science. Thank you for your prayerful and financial support of Origins... you're making the television production of this program possible.

OUTDATED THEORY

BOTH CREATION & EVOLUTION CAN'T BE TRUE!

(Can we prove or
disprove one?)

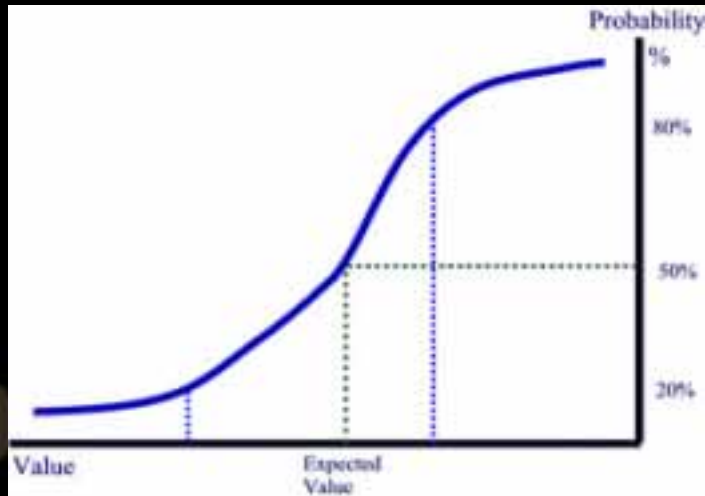

DISPROVING GOD IS IMPOSSIBLE

(e.g. total non-existence of a “thing”)

DISPROVING EVOLUTION IS POSSIBLE

(e.g. based on
acceptable
laws of
probability)

WHAT EVOLUTIONISTS ARE SAYING ABOUT EVOLUTION

OUTDATED THEORY

CHARLES DARWIN

- “Natural selection can act (work) only by the preservation and accumulation of infinitesimally small inherited modifications”
- “...by this theory, innumerable transitional forms must have existed... why do we not find them embedded in countless numbers in the crust of the earth?”

JOHN MAYNARD SMITH

- “The theory of evolution... does not predict the organisms will get more complex.”
- “For the present, we have to accept that the origin of molecules with unlimited heredity is an unsolved problem.”
- “To explain it’s (the genetic code’s) origin and evolution is a major challenge.”

RICHARD GOLDSCHMIDT

- Evolution of the animal and plant world is considered by all those entitled to judgment to be a fact for which no further proof is needed.”
- “It is true that nobody thus far has produced a new species or genus, etc., by macromutation. It is equally true that nobody has produced even a species by the selection of micromutations.”

DATED THEORY

STEPHEN J. GOULD

■ “I think I can see what is breaking down in evolutionary theory—the strict construction of the modern synthesis with its belief in pervasive adaptation, gradualism, and extrapolation by smooth continuity from causes of change in local populations to major trends and transitions in the history of life (e.g. the essence of the theory).”

DR. MICHAEL GROSS (evolutionist)

- “Nothing ever produced by human engineering efforts comes anywhere near the performance of these biological systems.”
- “[For instance,] biomolecules, which are found within every living cell . . . can carry out the most amazing tasks.”
- “It will become clear that nature’s superiority is much more obvious on the nanoscale than in large-scale engineering.”

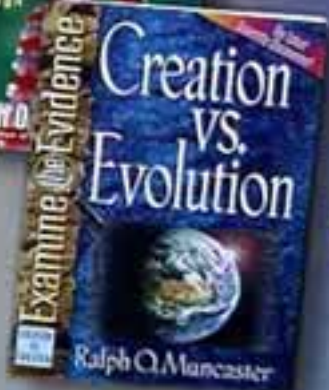

The Archer Fish:

Aim, Spit and Catch!

The *Archer fish* is famous for its ability to shoot down insects with a well-aimed spit of water, calculating where it's prey will fall.

The *Archer fish* has a reaction time twice as fast as the average human. The brain of this fish is capable of complex mathematics, including trigonometry and calculus.

Yet, evolutionists tell us that the *Archer fish* is just another product of millions of years of random, chance processes. Remarkable!
