I would like to personally thank you for watching the Origins program. Origins was a special program, near to the heart of my late husband, Russell Bixler.

I trust that the information in this presentation will be helpful in your study of creation science. Thank you for your prayerful and financial support of Origins... you're making the television production of this program possible.

God's Work in the Womb is Beyond Our Full Understanding

*⁵ As you do not know the path of the wind,

The Human Brain

A Marvel of Engineering!

The brain has over 10 billion nerve cells. It also sends out electrical impulses at almost 300 mph and receives 2,000 responses per second.

The brain constantly receives signals from 137,000 light receptors in the eyes, 100,000 hearing receptors from the ears, 3,000 taste buds, 30,000 heat sensors on the skin, 250,000 cold sensors and 500,000 touch sensors.

How can anybody believe this magnificent structure was not designed?
